PROFESSIONAL SUMMARY

Results-driven Full-Stack Engineer and Cisco-certified ICT Trainer with 3+ years building scalable, production-ready web applications across SaaS, EdTech, and AI-powered platforms. Creator of NEXA (1,000+ daily users) and QA Detective — demonstrating end-to-end product ownership from architecture to deployment. Proficient in React, TypeScript, Next.js, Node.js, Express.js, Supabase, PostgreSQL, Docker, and CI/CD pipelines. Trained 100+ students in Web Development, Cybersecurity, and IoT through Cisco Networking Academy.

KEY PROJECTS

NEXA — EdTech Platform | Full-Stack Developer & Creator

2023 – Present · <https://nexaedu.ng>

- Built and shipped a full-stack educational platform for NOUN (National Open University of Nigeria) students, scaling to 1,000+ daily active users using React, TypeScript, and Node.js.
- Engineered a CBT (Computer-Based Test) practice engine with real past-question simulation, enabling students to replicate real exam conditions and improve preparation quality.
- Integrated NEXA AI assistant delivering personalised answer explanations and concept feedback, driving measurable improvement in student study outcomes.
- Implemented PDF-to-audio conversion feature, making course materials accessible for on-the-go learners and improving platform accessibility.
- Architected the full system end-to-end — database schema, REST API, and responsive frontend UI — demonstrating complete product ownership.

QA Detective — Autonomous AI Testing Platform | Full-Stack Developer & Creator

2026 · <https://kerpaskey.vercel.app>

- Built an autonomous AI-powered QA testing platform that crawls web apps (up to 10 pages via Playwright), generates LLM-driven test cases using Groq (LLaMA 3.3 70B), and produces detective-style reports with actionable findings.
- Architected a Turborepo monorepo with 7 packages using Next.js 15, Express.js, BullMQ, Redis, PostgreSQL, and TypeScript end-to-end, with shared types via a common @qa-detective/shared package.
- Delivered automated testing across 7 categories: security headers & CORS, performance & FCP, WCAG 2.1 AA (axe-core), form validation & CSRF, broken links, load testing (k6, 20 VUs), and AI-generated reports.

PROFESSIONAL EXPERIENCE

Backend Developer | Styleit Padi

Aug 2025 – Dec 2025 · Remote · Dubai

- Engineered Supabase Edge Functions powering authentication, database operations, and serverless logic across 3+ production-grade projects, reducing backend provisioning time by ~40%.
- Designed RESTful API integrations using BaaS architecture, achieving sub-200ms average response times under concurrent load.
- Hardened application security via Row-Level Security (RLS) policies and secrets management, eliminating critical data-exposure vulnerabilities pre-launch.

Full-Stack Developer | GueCyber

2023 – 2025 · Remote · Belgium

- Architected and shipped 5+ scalable web applications and LMS platforms using React, TypeScript, Node.js, and Express.js for an international user base.

- Delivered pixel-perfect, WCAG-compliant responsive UIs with Tailwind CSS, Material UI, and ShadCN UI, reducing design QA cycles by 30%.
- Implemented TanStack Query for server-state caching, cutting redundant API calls by ~50% and improving perceived performance on low-bandwidth connections.
- Built and maintained GitHub Actions CI/CD pipelines and Docker deployment workflows, enabling consistent environment parity and eliminating manual release steps.

Software Instructor | [Clique Software and More](#)

Oct 2024 – Present · Abuja, Nigeria

- Delivered full-stack web development training (HTML, CSS, JavaScript, Node.js, SQL) to student cohorts, achieving 85%+ course completion rate.
- Designed project-based curriculum emphasising clean code, real-world application development, and industry tooling — producing portfolio-ready graduates.

Licensed Instructor — Web Dev, Cybersecurity & IoT | [Cisco Networking Academy \(NetAcad\)](#)

Jun 2022 – Jun 2024 · Abuja, Nigeria

- Facilitated Cisco-certified courses in Web Development, Cybersecurity, and IoT to 100+ students across two cohorts, aligned with global Cisco curriculum standards.
- Trained students in network security fundamentals, threat detection, and IoT device programming, preparing them for SOC and IT support roles.
- Maintained above-industry-average pass rate through hands-on labs, scenario-based assessments, and personalised support sessions.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript (ES6+), Next.js, HTML5, CSS3, Tailwind CSS, Material UI, ShadCN UI, Framer Motion, GSAP, Responsive/Mobile-First Design, WCAG Accessibility

Backend: Node.js, Express.js, RESTful API Design, Supabase (Auth, Database, Edge Functions), Firebase, PostgreSQL, Redis, BullMQ, SQL

AI & LLM Integration: Groq API, LLaMA 3.3 70B, AI-powered feature development, Prompt Engineering

Testing & QA: Playwright, k6 Load Testing, axe-core (WCAG 2.1 AA), Security & CORS Testing, Automated Test Generation

DevOps & Tooling: Git, GitHub, GitHub Actions (CI/CD), Docker, Turborepo Monorepo, Environment Configuration, Secrets Management

Cybersecurity & Networking: Cisco NetAcad Certified, Cybersecurity Fundamentals, IoT Programming, Network Security, SOC Awareness

CERTIFICATIONS

Cisco Networking Academy — Licensed Instructor Certification (Web Development | Cybersecurity | IoT) · Jun 2022

LANGUAGES

English — Fluent (Professional Working Proficiency)
